Social Skills Assessment Questionnaire (SSAQ)

Empathy and Other Related Constructs

Research Questions

1. Are there significant differences in social skills between the groups?
2. Is there a difference between the RE-E and RE-VSD?
3. What is the impact of both the RE and VSD?
4. Does the Relationship Enhancement Program improve other relationships?
5. Does the Relationship Enhancement Program improve academic performance?
6. What is the effect of the Relationship Enhancement Program on social skills?
7. Is there a difference in social skills between the groups?

Design & Methods

and Social Support for Adults with Autism Spectrum Disorders

There were 40 participants in both RE and RE-VSD groups. There were 20 participants in each group. The research design was a between-group design. Two treatment conditions were applied to each group: 1. RE; 2. RE-VSD. The two treatment conditions were as follows:

- RE-E: Group with ASD
- RE-VSD: Group with VSD

What is the impact of both the RE and VSD?
