Creating Advertising & Marketing Classes to Motivate the Millennial and Generation Z Cohort

Erika Grodzki, professor of advertising, social media and public relations
Stefanie Powers, associate professor of multimedia journalism
Andrew Burnstine, associate professor of marketing
Lynn University
It is no surprise that today’s students are distracted by social media platforms. Research indicates that today’s college students often find coursework repetitive and, at times, uninteresting. It is difficult for instructors to keep millennial and Generation Z students engaged.
• Researchers in this study utilize secondary research to investigate the problem.
• Differences between the generations are first discussed.
Differences

The generations are distinctive. Millennials grew up with technology and are considered “digital pioneers” while Generation Z members are “digital natives” and fully embrace technology (“Millennials vs. Generation Z: How Do They Achieve Success in The Workplace?” 2018). The findings from research indicate that different strategies must be employed for each group. This can cause a challenge for instructors as they are teaching both generational cohorts simultaneously. Overall, it is essential to emphasize practicality and innovation in the coursework. It is also vital that instructors have an awareness of current industry standards and integrate experiential learning practices in the classroom.

How could advertising and marketing instructors provide a better learning environment for millennials and generation z?
Generation Z as Prospective Students

TAPPING INTO THE BRAINS OF PROSPECTIVE STUDENTS

01. Overwhelmed by the application process
- 35% of students apply to 6+ schools
- 35% of students feel overwhelmed by the application process
- Only 55% of students attend their first choice

02. Worried about financing
- 77% have financial support from parents
- 1/3 of students need to take out loans
- 1/2 students who have concerns about financing college

03. Early decision becoming a bigger factor
- 65% say academic rep is most important
- 2.5x more students use early decision since it debuted in 1999

04. Less experience socializing face-to-face
- Only 39% of incoming freshman party
- 44% of students rank social activities as an important factor in their decision process
- 27% of students say they focus on social media

05. Undergrad is the first step in long process
- Bachelor's degree is the new high school diploma
- 86% of students go to college to get a better job
- 77% of students who plan on getting an advanced degree

Millennials
Who are they and how are they different?

According to Pew Research Center (2015) they spend twice as much time as boomers on self-care (dieting, therapy, working out), more likely to have a bachelor's degree (2016), to live at home longer, more liberal
Understanding Millennials

High-tech generation (Norum, 2003)

Status is important to this cohort (Eastman & Liu, 2012)

Concerned with social responsibility and environmental issues (Barber, Taylor & Dodd, 2009; Smith, 2012)

As learners, Millennials like a personalized approach and appreciate having a mentor.
Understanding Gen Z

Generation Z consists of those born between 1995 and 2012 (Twenge, 2017).

Generation Z adolescents is concerning considering the dramatic increase in the amount of time these students spend using technology. Social media platforms, search engine accessibility, and a multitude of applications, have further added to obsessiveness as well as distractions from habitual interactions.

With advances continuing to increase, it is critical to acknowledge the psychological effects that technology will have on the cognitive development of this generation of adolescent students.

Based on a survey of 743 U.S. teens (aged 13-17)
Source: Pew Research Center
Parents of generation Z students are more familiar with technology than parents in older generations. In addition, generation Z parents grew up with many social and economic hardships including an unstable economy and financial insecurities.

Additionally, generation Z adolescents are doing many adult activities (that are normally experienced in adolescence) later on than adolescents in previous decades.
How could advertising and marketing instructors provide a better learning environment for millennials and generation Z?

• Be aware of their privacy concerns
• Rely on articles and materials that can be easily accessed online
• Let them use their technological devices
• Give them autonomy and freedom
• Allow them to learn by observation or experiential practice
• Allow students to write and communicate in new ways
• Teaching approach, avoid long lectures, flip the classroom, try to personalize
• Online and in-class materials, provide a seamless transition between the two
• Classroom space should be clean, bright and organized
