Dedication to Sister de la Croix

We, the members of the sophomore class of 1967, would like to dedicate Marymount's annual graduation paper to a very outstanding woman, a woman whose extraordinary SPIRIT has reflected itself in each one of us. A SPIRIT of beauty, and of truth, and of love, an idealistic SPIRIT ever reaching for that yonder star. But even as that hand is outstretched toward the idealistic goal, somehow her two feet remain on "terra firma."

As President of Marymount College, she has willingly answered the challenge to quality Catholic education, fostering learning through an atmosphere of freedom. This SPIRIT will continue to flicker within us, influencing us, long after graduation. Thus, with great admiration, deep respect, and joyous SPIRIT, we the sophomore class would like to dedicate this graduation paper to a very SPIRITED woman, our mother, Mother de la Croix.

Awards Dinner
May 9, 1967

The student body and faculty gathered Tuesday, May 9, 1967 in the Marymount dining room for the annual awards banquet. At the completion of a delectable meal the presentation of honors and awards took place.

Freshman-Sophomore Class Dinner

Pal's Captains Table was the setting for the class of 1968 tribute dinner for the graduating sophomore class of 1967, Marymount's campus cleared at 7:30 Monday, May 1, 1967 as sophomores and freshmen piled into cars and proceeded to the first event in honor of the graduates. At the close of a savoury meal the entertainment was presented by Adele Hagedorn reading the Sophomore's Prophecy and Jean Mazzocchi reading the Sophomore's Last Will and Testament. Gleeful cries of surprise and recognition then applause filled the room as sophomores and freshmen recalled events and friends of the past year. Each sophomore received an engraved charm from the freshmen class. The Freshmen-Sophomore Dinner proved an enjoyable night for both classes as a result of the thoughtful planning of the Freshmen Class officers Adele Hagedorn, Dede Curran and Debbie Horan.

Last Will and Testament

I, Terry Minkowski, do make, publish, and declare this to be my Last Will and Testament in manner following:

1. Liz Crean, will to Terry Minkowski an arts and craft set for her and Ronnie and a front row seat in front of the TV for the soap operas.

2. Tali’e Mahler, will to Kathy Whalen my parents so they can come down for Parent’s Weekend next year and a little sister as nice as mine.

3. Barbara Kan, wil to Ruth Link’s a “mellow yellow Mustang” and all the repairs that go with it, and my cast and go mobile in case she ever wants to take a pleasant ride on Elsworth from her big sister.

4. Claudia Bowea, do hereby bequeath to Cheryl Merrit my first place in the cafeteria line with the hopes that the food selection will be much better in the coming year than it was in the past.

Our Meaning Of Security

1. Security is Mr. Monreal,
2. Security is having a carton of cigarettes when you have no money,
3. Security is having a ride into town,
4. Security is change of a dollar,
5. Security is a letter in your mailbox,
6. Security is gas in your tank,
7. Security is finding a nun on campus,
8. Security is having a roommate in business who types your papers,
9. Security is getting a call later in the night,
10. Security is a dead mouse in your trap,
11. Security is a dead mouse in your trap,
12. Security is being a Liberal Arts student and having a roommate in business who types your papers,
13. Security is having a quarter for wash when your wearing your last pair,
14. Security is having the first new dorm a name - and we the sophomores name it EXPO 67,
15. Security is graduation,
Tradition demands that commencement speakers pass the torch of leadership to younger hands, certain that the new generation is eager to receive this gift and this challenge from us. But commencement speakers are becoming more and more aware that the new generation is growing less and less anxious to accept our torch without question. The "new" generation seems not at all happy with the world of the "command" generation. The young simply no longer accept our worship of material success, our callous indifference to social injustice, our brink-of-war politics, our snubborn resistance to change.

Granted, we had our "rebels without a cause" in our time. But they predictably cooled down and joined the rest of us if the rat-race to "success." But this generation will not "cool it." Today's graduates live, feel, and think in direct opposition to the ones of our time. I sometimes get the uncomfortable feeling they would like to do away with everyone over thirty, and rebuild this messed-up old world from scratch. And they can do it, too. By sheer numbers alone we cannot ignore them. More than half of the people now living are under twenty-six, and growing younger! In this country nearly forty percent of the college age group are in college. There

The Flight From Teaching

Commencement Address by Dr. Gerard Maurice Donyon, Marymount College, Boca Raton, Florida, May 21, 1967.

Yes, we came back, most of us, but we did not return to the campus to build a better world - we came back to continue an interrupted career. And we succeeded beyond our greatest expectations. We, the Depression Generation built this affluent society which you now enjoy - or should enjoy - perhaps. "Perhaps", I add, because although we did beat the depression and won the war, we in the end sat down before the television to watch "I Love Lucy." Is this what we went to college for? Is this the torch we pass on to our graduates today?

Surveys show that the college student of a generation ago admired and wanted to work in Big Business. We were proud, as well as envious, of our classmates, reaching the executive suite. But, last year more of our top graduates than ever before joined the Peace Corps than the "command" generation! They are discarding the "material success, our callous without a cause" in modern society.

But, last year more of our top graduates than ever before joined the Peace Corps than the "command" generation! They are discarding the "material success, our callous without a cause" in modern society.

"But believe me honey, we tried", pleads my threatened generation. "We are the children of the Great Depression. You don't know the meaning of the word 'depression' for you've never known one."

Get the picture: everyone of us qualified for the Poverty Program! Your grandfather considered himself affluent on a WPA job at $140 a week. We worked our way through college selling magazines, and since no one had any money, $3.50 was a good week. And before we finished our schooling we were blasted out of college by Pearl Harbor. We didn't burn our draft cards - we enlisted by the millions. We spent our youth in some South Sea jungle or on the beaches of Normandy. Three years in the 31st Infantry, Second Division, and I was one of the lucky ones, I came back.
large. While our population increased eight percent since 1960, our college population increased forty percent. Within the next ten years we will need a half billion new college instructors. And, as industry and government continue to reduce our best-trained professors at the rate of an estimated ten thousand a year, the squeeze is felt even at the largest universities, forevermore, the university's recent loss of its teachers is to research. In this aporia between teaching and research, our universities devote full-time to research. More than two-thirds of university professors teach no undergraduate courses at all, he who still teach, mostly those in the lower ranks and with the least experience, average eight hours a week in the humanities and only six hours in the sciences. A professor's prestige, and consequently promotion, is measured by how successfully he avoids teaching. Under the pressure of "publish or perish" the university is a place where one is hired to teach and rewarded for not teaching. And of the little teaching that still practiced, it is the profession which carves no niche in our minds. A universal student gripe is, "If I want to complain about an exam, I see the secretary, then the reader, then the graduate assistant, then the teaching assistant, and then, maybe, 'God'.

Why do students demonstrate? Perhaps it is because the present college student is a better one than his father and mother, no longer satisfied with a piece of paper received at commencement, but asking, indeed insisting loudly, that along the way he be taught something. The "now" generation is interested enough in education to demand good teaching.

It is not my purpose today to discuss the merits or demerits of "publish or perish." Without research we would lose the race of technology; without publication our libraries would become mausoleums of ancient and out-dated knowledge; without laboratories we would condemn man to disease and hunger. So, our professor on the way up becomes a project-director while his teaching goes on tape. This is not to say there is no longer any great teaching in our universities. It only points out that the system does not favor the professor dedicated to teaching. Our universities seem to exist to train people to do research in universities.

But this need not and should not happen in our small college. Recent loss of its teachers is to research. Where will we find the replacements? Happily, there are many teachers-scholars in our universities tired of "bigness.

The largest universities. It only points out that the system does not favor the professor dedicated to teaching. Our universities seem to exist to train people to do research in universities.

But this need not and should not happen in our small college. Catholic education is costing us too much to be a pale shadow of secular education. We must justify our existence in other ways -- in ways which we can do best -- in that which is being neglected on a scandalous scale -- good teaching.

But at this time of great need our superior people are leaving the classrooms of our small colleges. Their replacements? Happily, there are many teachers-scholars in our universities tired of "bigness." There are some who do not hold that the instruction of undergraduates is simply an interruption of their research or consulting. Some still believe in the church-related college and wish to be identified with it. They can bring to the small college a reputation for scholarship and great teaching.

The Metaphorical Eye

(The following is a revised version of an address delivered at the Awards Dinner of Manhattan College, May 9, 1967.)

Two Prefaces — "All things resemble each other. Take, for example, a beach extending for as far as the eye can reach, bordered, on the one hand, by trees and, on the other by the sea. The sky is cloudless and the sun is red. In what sense do the objects in this scene resemble each other? There is enough green in the sea to relate it to the palm. There is enough in the sky reflected in the water to create a resemblance, in some sense between them. The sand is yellow between the green and the blue. In short, the light alone creates a unity..."

— Wallace Stevens

The Necessary Angel

This second preface is personal. It was written on a Sunday while driving out to school to put this speech together. I was on my way to look across the polo fields to the west, possibly a mile away, at the thick black smoke. I could not resist it, or the call away from it. As the car turned toward the west and the smoke, as it turned out, burned over, it was as if we were 
ning at least a square mile of pine and brush burning andapparently engulfedthe blaze for an hour or so, trampling up and back from this area and northward to the west. As we approached, I thought of the sense of my own eyes. But sometime during that hour I saw something which enormously startled -- and pleased me. As I stared into that small-time inferno as it leaped from one puny to the other, I became aware that the smoke was a-blaze and a-flame, and the "shattered water" was a-blaze and a-flame; and I was quick to say that as this in-night came to it was gone. Needless to say, neither the blaze nor the water will ever by the same again.

Our prefaces now are ended. As I stand here in this summer evening, with my glasses affixed properly and the lecture clear, I must still confess that I cannot see you. Oh, I know that you are there, that at least someone is there, but I cannot see you. I like to imagine you as me. We are all afflicted with a spiritual myopia, near-sightedness, and solitude. All of us. And not just here, tonight, I, and your parents, and my parents are not really seeing you when we sequester ourselves in the faculty lounge, trying to avoid as many students as possible. You are not seeing us, or what we want desperately to show you, when you indiscriminately, blink-eyed, unquestioning, unthinking, in class. We, the faculty, refuse to see each other when we allow ourselves our petty feuds with one another. Our own gossip, our backbiting. The administrative will not, cannot, will not, see any of us, as they blithely proceed along their way, ignoring the advice and criticism of everyone around them. Non of us are free of clouds of prejudice, indifference, arrogance, or the arrogance of those who recognize an essential unity to them all, and she will not see in that way all of them. The world will become less and less a crazy-quilt, a collage, a kaleidoscope of undeciphered, separate particles. She will see that trees, mountains and mountains and oceans all are not cut off, apart from one another, but belong to the world, to "nature." Unfortunately, we are not that easily, ever, learned to see as children. We forget how to make, how to recognize their attributes, separate par.

terial, that image to mean that one tree, then another, and then a third, and then a fourth, until we are able to recognize an essential unity to them all, and she will see that all of us are interconnected, joined. A poet will say, describing his mistress, "the garden of her face." And though we could take that image to mean that she has a carpe for a nose and radishes for cheeks, the poet (most likely) means something a little more. He means that the qualities of bloom, growth, freshness which a garden evokes are also to be seen in the garden itself, and each other, two radically different things are then in this metaphorical sense in some ways to the same. And the world has been pulled together more tightly, together.

There seems to be a universal mode of thought, this way of seeing. A handshake, for instance, on one level, is a metaphor; two people are momentarily joined, A kiss is a metaphor. Sexual union is the greatest metaphor of them all; in which, at its most profound, it is impossible to speak of two people becoming one, but instead one person finally becomes the other. We see it, on still a different level, when we look at the man in our own home; we see it in tall, green-glassed building on the East River in New York City; we see it in all of those buildings, those candle-sticks with the silver ship that soon is to go sailing silently across the heavens to usher us in, see our moon, as it settles softly on its surface like a kiss, as people raised in the Christian tradition, we have a special command to see God as man, here, still among us. "And we must constantly affirm the Resurrection (and downplay the Ascension and Assumption). Christ has arisen. He is still with us. But we, like those travelers who sailed and needed to Emmaus, cannot nor will we ever see Him, recognize Him. And most important, you all we only think he is "above us," above the "dividing stone of the elders and the elders and the stones" to see you in him. I do not see him in my strange, dreamy uncle, in my spinster, lame aunt in my sad and dark brother; in my lovely and brave mother, in my father, in any of them. I must learn to see him in my strange, dreamy uncle, in my spinster, lame aunt in my sad and dark brother; in my lovely and brave mother, in my father. We must learn to see Him in the nigger down the block, the Jew across the tracks, the Viet Cong across the world. You must see Him in your roommate; or you will never see him in your womb.

And most important, you will never see yourself in any of them. You will never see yourself or your God in them. When in the sun shine we will not see the wonder, or in the lakes we are to walk by, or the grass on the trees, will we ever see that we and God and each other are not cut off, unrelated, alone. We can never hope to see all this till we open the eyes of our own souls and the eyes of our spirit, and go out with hope and humble, quiet joy.
